Presentation Details

Title: Rheology in the resource industry

Abstract: The resource industry is dependent on understanding and controlling the rheological behaviour of the material it processes. During the presentation, Dr Coghill will provide an introduction to the Rio Tinto Bundoora Technical Development Centre and how rheology is used to develop and control mineral processing flowsheets, address operational issues and ensure safety.

Speaker Biography: Dr Mark Coghill (Principal Advisor, Rio Tinto) is a process metallurgist with over thirty years of experience. He specializes in solid-liquid mineral processing separation, dewatering, transport and management of tailings, water management and recovery. Read more about his experiences [here](#).
